AMENDMENTS TO THE CLAIMS

1-15. (Cancelled)

16. (Currently amended) A method for providing access to interactive features of electronic program guides (EPGs) from within broadcast advertisements, comprising:

receiving broadcast audio and video content along with a promotional metadata file associated with the broadcast audio and video content, the promotional metadata file including a plurality of data items, the data items including a promotion type, the promotion type including a purchasable event and an interactive advertisement;

presenting the interactive advertisement, the interactive advertisement including a selectable option for the user to store the interactive advertisement on a user-defined storage device for future viewing ~~on a digital video recorder (DVR);~~

receiving a user selection to store the interactive advertisement for future viewing of the interactive advertisement on the storage device ~~DVR~~; and

storing the interactive advertisement for future viewing of the interactive advertisement on the storage device ~~DVR~~.

17. (Previously presented) The method of claim 16, further comprising:
presenting a promotion based on at least a portion of the data items;
receiving a selection of the promotion;
collecting payment information, if the promotion type is the purchasable event;
and

presenting a full screen of the promotion, when the promotion type is the interactive advertisement.

18. (Previously presented) The method of claim 17, wherein a plurality of promotions is interspersed among the broadcast audio and video content.

19. (Previously presented) The method of claim 17, further comprising:

presenting the promotion within an electronic program guide (EPG), when the promotion type is the interactive advertisement.

20. (Previously presented) The method of claim 16, wherein the data items include a web action and a web address and further comprising:

receiving a selection of the web action; and

providing access to a web page associated with the web address.

21. (Previously presented) The method of claim 20, wherein the web page is displayed in a picture-in-picture (PIP) window.

22. (Previously presented) The method of claim 17, wherein the data items include a show date, a show time, and a tune action; and further comprising:

determining whether the promotion is for an event that is presently playing using the data items, the data items including a show date and a show time;

setting a reminder, when a program reminder is selected and the event is not presently playing; and

tuning the event, when the event is presently playing and the program reminder is not selected.

23. (Previously presented) The method of claim 22, further comprising:
setting a recording device, when the event is not presently playing and the program reminder is not selected.

24. (Previously presented) The method of claim 16, further comprising:
storing a plurality of promotions; and
presenting the stored promotions.

25. (Previously presented) The method of claim 16, wherein the data items are selected from the following: a product identifier, an EPG action, a force tune channel identifier, timing information, a network, a price, a synopsis, and an

advertisement identifier.

26. (Previously presented) The method of claim 25, wherein the EPG action is selected from the following: a tune action, a reminder action, a web action, a pay-per-view purchase, a store action, and a record action.

27. (Currently amended) A set top terminal for providing access to interactive features of electronic program guides (EPGs) from within broadcast advertisements, comprising:

- a network interface to receive broadcast audio and video content along with at least one promotional metadata file associated with the broadcast audio and video content from a distribution network;

- a promotional metadata storage to store the promotional metadata file, the promotional metadata file including a plurality of data items, the data items including a promotion type and an EPG action, the promotion type including a purchasable event and an interactive advertisement;

- a presentation component to provide a presentation and a plurality of navigation tools, the presentation including the broadcast audio and video content, at least one EPG, and at least one promotion, the promotion being based on at least a portion of the data items;

- a display interface to present the presentation and navigation tools on a display device;

- a user-defined storage device for storing the interactive advertisement, when the user selects an option to store the interactive advertisement for future viewing, during the presentation of the interactive advertisement; and

- a digital video recorder for future viewing of the stored interactive advertisement by the user;

wherein the navigation tools provide interaction with the EPG action within the promotion.

28. (Previously presented) The set top terminal of claim 27, wherein the
